
DASH T3

your new standard for mPOS

Customer Facing

Portrait Mode

The DASH/T3 is a 10.1" Windows Tablet PC, designed to provide portability and mobility in many vertical applications. The T3's versatile design offers several integrated device options, such as magnetic stripe reader, smart card reader, biometric reader, and 2D barcode imager. It also offers connectivities to additional devices via its WiFi, Bluetooth, and USB ports.

The T3 offers several mounting options: a standard LP base, an advanced UP base with 2 USB ports, and a wallmount kit. With each mounting option, the T3 can be detached from its dock to provide some mobility.

The UP base allows the T3 to be rotated to either a landscape or a portrait view, to meet the application's requirement. It also allows the T3 to be tilted backwards to face the customers. The UP base comes with 2 USB ports to support additional devices such as printer, barcode scanner, or customer display.

With Windows 8.1 preloaded, application developers will take less time to migrate or develop a mobile application. As a result, the T3 allows a quicker "go-to-market" product release, and a larger return on investment.

Pioneer POS Inc. designs and manufactures a complete line of industry specific all in one computers, touch screen monitors, kiosks, and tablets. Founded in 1994 and based in California, Pioneer POS's solutions have been deployed in the Retail, Hospitality, Factory Automation, Gaming, and Healthcare environments. Pioneer POS has built an exceptional reputation with its customers and solution partners for superior flexibility and responsiveness to customer needs including short lead times, long product life cycles (minimum of 5 years), easy customization, and quick turnaround. Pioneer POS sells through qualified technology resellers throughout the US and globally.
