

# MAGNUS BOXi

*the most powerful POS terminal with data redundancy!*

The BOXi is equipped with RAID-1 option which allows automatic hard drive mirroring. By using 2 hard drives, your data will be continuously duplicated onto the second drive. If one drive fails, the BOXi will automatically run from the second drive, thus reducing down time. Plug in a replacement drive, and BOXi will re-build the new drive by itself.

If you have only one terminal setup to manage your store, BOXi with RAID-1 is an ideal solution to run both as your POS Workstation and as Back Office Server. It will handle your daily transactions with speed, and in the same time it will duplicate your data to the second drive.

In a multiple terminals setup, you can deploy several standard BOXi as workstations, and one BOXi with RAID-1 as the Back Office Server. This Server terminal can also be used as a POS workstations to handle daily transactions, or as a Manager's station. All terminals will communicate via BOXi's blazing network (upto 1G BaseT.)

## SPECIFICATION

**Processor** Intel Pentium Dual Core, or Core 2 Duo  
**VGA** Intel GMA 3000  
**Memory** 1GB, upto 4GB DDR2  
**Hard Drive** SATA 80GB+  
**O/S** Windows XP Prof, WePOS, Vista, Linux  
**Power Supply** External, 250W, 100-220V auto select  
**Dimensions** 16.5" (W) x 11.6" (D) x 4.75" (H)  
**Listings** FCC, CE, UL  
**Options** RAID-1 with (2) Hard Drives  
 RF 802.11

**LAN Ports** Intel 10/100/1G BaseT, with vPro  
 4 x Serial, RJ45  
 1 x Parallel, DB25  
 6 x USB 2.0  
 2 x poweredUSB +12V  
 1 x poweredUSB +24V  
 1 x VGA
